Lecturer,
Department of Social Work,
Hong Kong Baptist University

Mr. Stephen Kai-Yi WONG

Barrister,
Privacy Commissioner for
Personal Data, Hong Kong

Introduction:

"Is it a boy or a girl?" From the moment of birth, this is the very first question likely to be asked. But, what if the answer to this question is not a straightforward one? Intersexuality, also known as Disorder of Sex Development, is an umbrella term for rare but numerous genetic conditions whereby the karyotype, gonads, and genitalia are not entirely male-typical or female-typical as classified in most contemporary societies. This symposium brings together intersex adult, clinical psychologist, paediatric specialist, human rights barrister and researcher with the aim to comprehensively address intersexuality.

All are welcome.
